

# Liver Disease Prediction Report

Generated at: 2025-12-19 10:50:40

**Result: ■■ Likely Liver Disease Detected: Fatty Liver (NAFLD)**

Stage: Mild

Risk Score: 42.5 (Moderate Risk)

**Preventive Measures:**

- Reduce fried and sugary foods.
- Lose 5–7% body weight.
- Exercise at least 30 minutes daily.
- Avoid alcohol completely.

**Doctor Insights:**

Pattern suggests fatty liver or mild hepatocellular inflammation — lifestyle modification recommended.

**Summary:**

Abnormal levels detected in: Direct Bilirubin, Alkaline Phosphatase, ALT, AST, Total Proteins, Albumin, A/G Ratio
